Diesel Radiant Heater	Heat Output BTU/hr		Fuel Consumption gallons/hr		Tank Capacity gallons	Power Requirements	Dimensions (H x W x D)	Weight (lbs.)
	High	Low	High	Low				
	140,000	100,000	1.02	.75				

Radiant heat is clean, portable and extremely efficient. Radiant heat penetrates evenly on and into surfaces just like sunlight. It heats people and objects rather than air or space. Radiant heat travels in straight lines and does not rise to the ceiling like hot air. This green machine radiant heater has zero heat transfer loss when utilized outdoors because of weather conditions like rain, snow, or high winds. They are great for temporary smoking areas during special events, modeling shoots, and entrance-ways.

- ✓ Each unit emits 140,000 BTU's (41,000 watts) of heat
- ✓ Features include built in thermostat and high/low switch
- ✓ Safety devices include; overheat protection, overvoltage detector and tip-over switch
- ✓ Produces no odor or smoke while running
- ✓ Portable, convenient wheels and pull handle
- ✓ Simple to operate
- ✓ City of New York, Department of Buildings MEA 351-03-E
- ✓ **No Fan**
